PROFESSIONAL SUMMARY

Product Engineer with 3+ years of frontend experience (**Vue.js, TypeScript**) and 10+ years across software engineering and QA, operating at the intersection of **product, engineering, and operations**.

Partner closely with stakeholders to translate **business needs into scalable, user-centric solutions**, with a strong focus on simplifying workflows and improving operational efficiency.

Proven track record of **owning features end-to-end**, from requirement gathering and system design to implementation, monitoring, and user feedback. Recognized for combining **product thinking, engineering execution, and quality-first mindset** to deliver high-impact solutions.

SKILLS

Frontend: Vue.js (Vue 3), TypeScript, JavaScript, HTML, CSS, Quasar

Product: Requirement Analysis, User Workflows, Stakeholder Collaboration

Testing: Cypress, Postman, REST APIs, SQL

DevOps: AWS, Kubernetes, Terraform, ArgoCD, Helm, Git, CircleCI, Grafana, Datadog

Tools & AI: Jira, GitHub, Figma, Copilot, Cursor, ChatGPT

WORK EXPERIENCE

Product Engineer (Frontend)

Hello Chef, Dubai | Dec 2022 – Apr 2026

- **Led end-to-end delivery** of key product initiatives (**CLT Turbo, Recipe Flow, and Pivot Procure**) from requirement gathering to production, **simplifying operational workflows** and reducing manual effort
- Built scalable Vue 3 frontend features, improving usability and efficiency for internal operations teams
- Partnered with **stakeholders** across Product, Operations, and Customer teams to translate business needs into scalable solutions
- Led migration from **Vue 2 → Vue 3**, improving performance and maintainability by **20–30%**
- Improved development efficiency by **~25%** using **AI tools (Copilot, Cursor, CodeRabbit)**

Product Impact & Platform Contributions

- Improved Admin 2.0 performance, reducing recipe load time from **10.35s to 140ms (~98% faster)**
- Optimized workflows, reducing recipe cloning time by **~40%** and recipe creation time by **~65%**
- Enhanced search performance, improving response times by **80–97%**
- Defined and tracked **SLOs using Datadog**, improving system reliability and observability
- Automated **XmR calculations** for **DORA metrics** to enable real-time tracking of **ELITE** level team performance
- Implemented **affiliate tracking via Google Tag Manager**, enabling marketing attribution and data-driven decisions
- Collaborated on API design and data flow with backend teams, improving system integration

Senior Manager (QA Engineering)

Morgan Stanley, Mumbai | Aug 2017 – Nov 2022

- Led QA strategy for high-volume financial systems (Trade Enrichment & Allocation)
- Delivered regulatory programs (MiFID II, Brexit) with **zero high-severity production defects**
- Built Cypress **automation frameworks**, reducing regression effort by **~30%**
- Managed **cross-functional stakeholders** across business, QA, and engineering teams

Module Lead (QA Engineering)

Persistent Systems, Pune | Dec 2012 – Apr 2017

- Delivered end-to-end testing across **web and mobile applications** in **financial domains**
- **Automated workflows** using Bash and Java; performed API and database validation using Postman and SQL
- Led defect tracking, debugging, and release validation in **Agile environments**

KEY STRENGTHS

- **Product Thinking:** Ability to understand user context and solve real business problems
- **End-to-End Ownership:** From ideation → design → implementation → feedback
- **Workflow Simplification:** Focus on reducing complexity and improving efficiency
- **Stakeholder Communication:** Strong collaboration across technical and non-technical teams
- **Quality-First Engineering:** QA background enabling robust, reliable systems

EDUCATION

Bachelor of Engineering in Computer Science - St. Francis Institute of Technology, India

COURSES & CERTIFICATIONS

- JavaScript (Basic) – HackerRank
- HTML, CSS, JavaScript – Udemy
- ArgoCD & Helm – Udemy
- OpenAI API Bootcamp – Udemy
- Design Thinking with AI by IDEO
- VPC (Value Proposition Canvas) by Strategyzer
- Extreme Programming Explained: Embrace Change
- Microsoft Certified: Azure Fundamentals

RECOGNITION

- Promoted to **Product Engineer** at Hello Chef for strong product ownership and workflow simplification
- Promoted to **Senior Manager** at Morgan Stanley for consistent delivery and leadership
- Promoted to **Senior Software Engineer** and **Module Lead** at Persistent Systems based on sustained performance and technical contribution
- Recipient of **9 Star Performer Awards** at Persistent Systems
